

Betty and David Koetser Foundation for Brain Research Research Proposal

The Betty and David Koetser Foundation supports clinical and basic research in the field of brain research with focus on the investigation of movement disorders and neuropsychology as well as other research areas in which a successful exchange of ideas between basic research and clinical application was established. Predominantly funding is provided for brain research performed at the Clinic for Neurology of the University Hospital Zurich and, in second instance, for brain research in the rest of Switzerland.

Deadline for applications: March 1st of the running year

Research proposals should contain the following (please use template file):

1. Information on the applicant(s)

Name, address and coordinates of the applicant(s) (phone, fax, email)

Name of person to be funded (if applicable) and a short description of tasks within the Project

2. Project title

3. Summary of the project (scientific abstract) – ½ page

4. List all proposed, approved or already received funding from other sources for the same project including information on the amount (CHF) and source

5. Amount requested: Please provide details and justifications

(typical requests are for CHF 10'000-40'000)

6. Requested start of the funding

(Earliest start date is October 1st of the year the call is published; funding is provided for 1 year maximally)

7. Introduction/Background (state of the art of the field and applicant's own contribution)

8. Goals of the projects with aims and hypotheses

9. Research plan including methods

Introduction, goals and research plan should not exceed 3 pages (Arial 11pt, line spacing single).

10. References

11. Short CV of applicant(s) and person to be funded (if applicable) – including a list of publications covering the previous five years

Please submit proposals or direct further questions to Mr. Taner Aydinalp by email: taner.aydinalp@hifo.uzh.ch
